JL SAMODRA NO 28B

Dedicated Informatics Engineering student with a strong passion for Data Science, Analysis, Machine Learning, and Web Development. Experienced in building robust data foundations, including designing hybrid bi-directional data replication architectures using Oracle 11g and SymmetricDS to ensure business continuity and data integrity. Skilled in developing modern web applications with backend technologies such as Nest.js and Laravel, as well as frontend frameworks including Next.js and Vue.js. I possess a solid technical background complemented by a detail-oriented approach and strong soft skills in leadership, communication, and project management. Committed to leveraging data-driven insights, scalable systems, and innovative digital solutions to solve complex challenges and contribute effectively to collaborative teams in a professional environment.

Work Experiences

UNTUNG BERSAMA SEJAHTERA - Surabaya - Indonesia Oct 2025 - Jan 2026

Hybrid Data Replication gateway/Intern

A leading Indonesian gold jewelry and precious metals manufacturer, providing high-quality products since 1981.

- Engineered a bi-directional data replication architecture between Oracle 11g (Central) and MySQL/MariaDB (Edge) using SymmetricDS to ensure seamless data flow.
- Maintained 100% data consistency and business continuity by enabling edge servers to handle local operations during network outages.
- Implemented automated conflict resolution strategies to safeguard data integrity across distributed database nodes and outlet branches.

TOKOKOCOMOTO - Magetan - Indonesia Jan 2026 - Apr 2026

Fullstack Dev

Glasses E-Commerce Website

- Developed a full-stack glasses e-commerce website using NestJS for backend development and Next.js for frontend development with Integrated Supabase for database management, authentication, and API services.
- Deployed and optimized the application using Vercel to ensure scalable performance and responsive user experience.
- Used access tokens to verify user identity when accessing protected API routes between the frontend and backend.

Education Level

Institut Teknologi Sepuluh Nopember - Indonesia Aug 2023 - Sep 2027 (Expected)

Diploma, 3.43/4.00

Organisational Experience

Himpunan Mahasiswa Teknik Informatika ITS - Surabaya - Indonesia Jan 2025 - Dec 2025

Deputy Head of Competition Bureau

Student Organizational division focused on facilitating, developing, and preparing students to participate in non-academic competitions.

- Served as Deputy Head of Competition Bureau at HMTC ITS, responsible for assisting the Head of Bureau in managing and developing the Informatics Engineering competition team in both technical and non-technical aspects.
- Coordinated team preparation for various academic and competitive events, supported project planning, strengthened communication among members, and ensured effective collaboration to achieve organizational targets and outstanding performance.

NUSAJAR - Surabaya - Indonesia Oct 2024 - Oct 2025

Head Of Division

Education Tutoring institution that focuses on online learning for students for National Exam

- Responsible for managing external communications, building positive relationships with students, teacher, and partners.
- Promoting programs through various media channels, and maintaining the institution's public image and reputation.

Ini Lho ITS - Forda Magetan - Surabaya - Indonesia Dec 2023 - Feb 2024

IT Dev

- Designing, developing, and maintaining websites to support organizational needs, ensuring functionality, responsiveness, and user-friendly interfaces.
- Providing expertise in web technologies, optimizing system performance, and implementing creative digital solutions to enhance online presence.

Skills, Achievements & Other Experience
